

How to Install RustThundra Theme for CodeBlocks

1. Go to *installation* directory
2. Run *cb_share_config.exe*
3. under *source*, choose location of *rustthundra.conf*
4. under *destination*, choose location of *default.conf*
default.conf is Located in *C:\user\appdata\roaming\codeblocks*
5. click **transfer**
ensure that under source, the items are selected.

6. click **Save!**
7. run *CodeBlocks*
8. go to *Settings / Editor*
9. click **Syntax Highlighting** under *colour theme*, select *rustthundra*, and click **ok**
